

ENVEUROPE

ENVIRONMENTAL QUALITY AND PRESSURES
ASSESSMENT ACROSS EUROPE: THE LTER
NETWORK AS AN INTEGRATED AND SHARED
SYSTEM FOR ECOSYSTEM MONITORING

EnvEurope aims at a deeper understanding of ecosystems functioning through a shared scientific knowledge, a common information management system and the harmonization of parameters and methods. It contributes to the integration and coordination of long-term ecological research and monitoring initiatives at European level, focusing on the status, changes and trends of of terrestrial, freshwater and marine ecosystems with an integrated broad-scale and cross-domain strategy.

50

Parameters monitored
and exploited to select a
set of key environmental
quality indicators

11

Countries and
more than 40
organizations
involved around
Europe

67

Sites representing major
environmental and
socio-economic gradients
of Europe
